OPERATION APOLLO
Central LA

OBJECTIVES:

- Clear the entire complex.
- Rescue all civilians.
- Prevent the deal, and neutralize all threats.
- Safely evacuate our undercover officer.

Just over a month ago, an undercover SWAT officer, successfully infiltrated a LA gang in the hope of gathering some evidence on them to put them away for good.
We already know they are dangerous:
three of their members were recently sentenced to life in jail for the kidnap and torture of a number of innocent civilians over the period of a year.
Word spread to us through the undercover officer that a deal was taking place tonight at a motel in central LA.
Money and weapons will be handed over from our gang to another gang.
This deal marks the convergence of these two gangs, who together would pose a huge threat to both civilians and law officers.

Your objective tonight is to infiltrate the motel and prevent the deal from taking place using any means necessary.
We have reason to believe that the money being handed over is from a recent raid on a jewellery store, not so far from the motel itself.
Try to get that back too.

We need you to clear out the entire complex.
Innocents will be occupying some of the motel rooms,
whilst the threats will be in the others.
Evacuate the civilians inside the motel and diner to ensure their safety.
Also, be wary of our man who will be inside the motel with the gang,
provided his cover hasn't been blown by then.

Precise marksmanship is the key.

BRIEFING:

Everything was going to plan until around 9:30pm.
The owner of both the Apollo motel and next-door Apollo diner has been assaulted in his living quarters by one or more gang members, and we think he's in serious danger.
A car pulled up outside the motel reception area and 4 men stepped out.
One proceeded to deal with the motel/diner manager,
whilst the other are believed to have made their way next door to the diner.
There is a second entrance to this diner in the back of the reception area.
Highground reports that a few late night customers are being held inside the diner.
This effectively means that the threats have occupied the entire complex,
and secured it ready for the deal to take place.
Any customers occupying the motel rooms are also being held by suspects,
or have been locked in, possibly still unaware of the events unfolding around them.
Also two other cars pulled up outside the motel, carrying other gang members.
They probably saw us, so our presence won't be a surprise for long.
That's why we're going to solve the situation at once.

ENTRY:

The motel is a 2 level complex.
Six normal motel rooms, four luxury, and two family rooms accompany a reception area and the manager's living quarters.
The place is not so old, so it could be hard to get in.
Therefore equip C2.
The diner has large glass windows at the front and left side, meaning that any entry from this angle would leave your team exposed to the threats inside.
We recommend that you enter from the reception area of the motel,
although the option to enter from either angle is available to you.
The Diner consists of a seating area and a bar, a kitchen, as well as a private office which is attached to the motel.

This is the Reception entrance of the Apollo Motel.
So this will be your way into the reception,
living quarters, and office.

The room has a large window, so pay attention.
Although there are no suspects being spotted here,
you never know …

SUSPECTS:

Gang Members:

These gang members have usual clothes on.
So they will look very much like civilians.
They will also try to hide themselves in darkened Motel rooms.

None of them have Body armour, although it can be that they equipped their guards with some heavier stuff.

Don’t expect them to be surprised when we arrive.
They’ll be ready for us…

CIVILIANS:

Undercover Cop:

Sex: Male
Descent: Asian
Eyes: Blue
Hair: Blond/Brown

This is our Undercover Cop.
When clearing the complex, keep your eyes wide open for him.
Make sure you evacuate him,
if his cover hasn't been blown by then …
Look very good because he can have different clothes on, than the one on the Photograph.

Manager:

The Manager of the complex will likely be in his living quarters.

Innocents:

The other civilians will be the ones occupying the Motel rooms.
Mostly locked in, or guarded.
We don’t know their number, but the Motel counts 12 rooms.
So there will be even more civilians.
